

¿ DID YOU KNOW THAT .....

...there is a racetrack in Barcelona and that it is the only one in Spain?

...800 greyhounds are made to race without adequate prevention or treatment of their injuries?

...the racetrack does not comply by the identification or kennel facilities of Catalan regulations?

...each month many greyhounds retire because they don't run fast enough, and many others are imported from Ireland with insufficient control on their transport?

...in Catalunya there is no enforcement of the law to regulate and protect from abuse, negligence and use of stimulant drugs of animals used in lucrative competitions, such as greyhounds, horses, singing birds and pigeons used in competitions?

If you feel outraged that people make money over bets based on the suffering of these beautiful and docile dogs, please sign below. With your signature you will be showing your opposition to the Barcelona racetrack and will be demanding efficient administrative control or its closure.
